

INTEGRATED SYSTEM GROUP

Providing comprehensive
automatic identification
and data collection solutions
for the material handling industry

The New Landscape of Material Handling Requires World-Class Experience

Part of the FAST Suite of Flexible Automation Solution Tools

Since 1971, we have been providing total automatic identification and data capture solutions for the material handling industry worldwide. Our experience has enabled us to develop a suite of baseline systems from which custom solutions are developed—custom solutions that meet your exact needs. We have successfully expanded our offerings of world-class industrial bar code scanners and CCD Imagers to include a full range of services:

- Program Management
- Design and Simulation
- Software Development
- Site Preparation
- Installation and Commissioning
- Transition to Operations
- Testing
- Technical Support

As a prime contractor, we give you a single source for system design, development, installation, software development, service, and support.

Industries Served

- Food and Beverage
- Document Processing
- Distribution
- Packaging
- Logistics
- Warehousing
- Parcel
- Pharmaceutical
- Postal
- Entertainment
- Manufacturing
- Meat and Poultry
- Freight Consolidation
- Airline Baggage
- Retail

Operational Need	FAST Suite Application
Item Sortation	FAST Sort® A comprehensive solution for automated sortation control
In-motion Label Printing and Application	FAST Label® Automate in-motion labeling in a few easy steps
Production Counting	FAST Count™ An all-in-one production counting system
In-motion Weighing	FAST Weigh™ In-motion weighing at the touch of a button
Data Integration and Management	FAST Comm® A configurable data management and host communications solution
System Monitoring	FAST Monitor™ A browser-based real-time remote monitoring application for tunnel systems

The suite of FAST products offers the latest in configurable, complete solutions for material handling. Used individually or as an integrated package, the FAST systems keep your operations performing at peak efficiency. From automated sortation and labeling to data management and more, FAST solutions from Datalogic keep you moving.

Features

Configurable software for I/O and device controls, sortation tracking and acknowledgement and performance diagnostics
High-speed sortation control, including scan, track, sort, confirm, report and statistics
Resides seamlessly on new or existing conveyor systems
Integrates with small-item sortation system (a fully automated, small-footprint sorting machine)

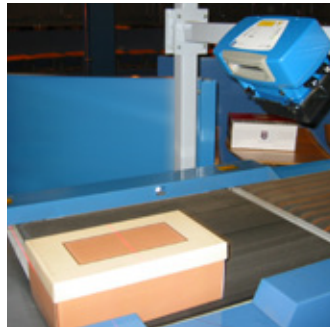

A complete system of bar code scanners, positioning sensors, printer applicators and software for automated labeling and verification
Offers flexibility and ease of configuration for all print-and-apply parameters
Configurable package tracking values, conveyor interface setup, user security, product data tables, diagnostic information and request generation
Includes integration with WYSIWYG label design software for customization and addition of up to 50 label formats

Easily captures, stores and reports activities from multiple lines by date, shift, line and product code
Designed for productivity monitoring, multi-line reporting, product verification, shift reporting and production data archiving
Maintains up to 31 days of accurate statistics on product throughput, allowing on-demand or scheduled production reporting
Run on a single PC or on our industrial control module for multiple-line data collection and reporting

Centralized control and repository to manage your weight capture and labeling requirements
A single Master Product table, is drawn upon for Net and Tare weight control and maintenance as well as serialization of cartons
A touch screen user interface makes it easy to operate the static scaling station
Visual on-screen indicators provide instant accept/reject feedback to the operator
The system performs look-ups to determine label format, target net weight, Tare weights, as well as all product date coding

Allows operators to configure, monitor and maintain database, reporting and other processing activities
Includes ODBC connectivity for reading directly from our or other remote customer database
Features TCP/IP for client to remote server and server to remote client, datastream protocols and RS232/422 serial data exchange
Can be combined with other FAST tools to integrate data management

Monitors multiple products on-site or at remote locations using a simple browser connection to the company network
Provides statistical performance data in preconfigured views plus automatic status/error condition reporting of all connected products
Multiple layers of user-definable access—from view-only to full configuration rights
Immediate notification of error conditions—3 clicks from alarm to root cause

We are your source for turnkey solutions.

Our Integrated Systems Group has developed effective solutions for small-item, large, and mixed-mail sortation, labeling, production, shipping, manifesting and inventory systems. Also provided are design, engineering, hardware, software, installation, training and on-site service support.
