Sortation Made Easy with SNS Modular Sortation System

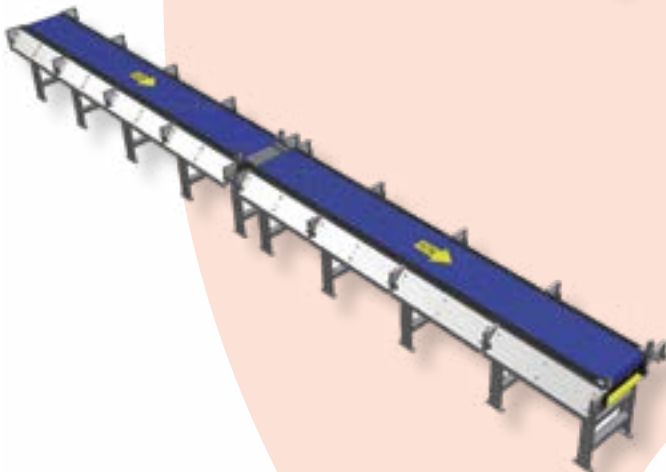

Introducing a comprehensive modular system that can quickly integrate into your system and easily expand to meet your growing needs. The SNS Modular Sortation System provides sortation solutions for polybags, padded envelopes, small and large parcels. Our quiet, scalable solution can be configured in different modules to meet your facility's needs.

Find The System That Is Right For You:

Standard Unit Module:

- 24-Volt Motor Driven Transport And Divert Roller System
- Bi-Directional Diverters
- Unlimited Expansion
- Manual Or Automatic Induction System
- Optional Dimension, Weigh, Scan System Available

Continuous Belt Module:

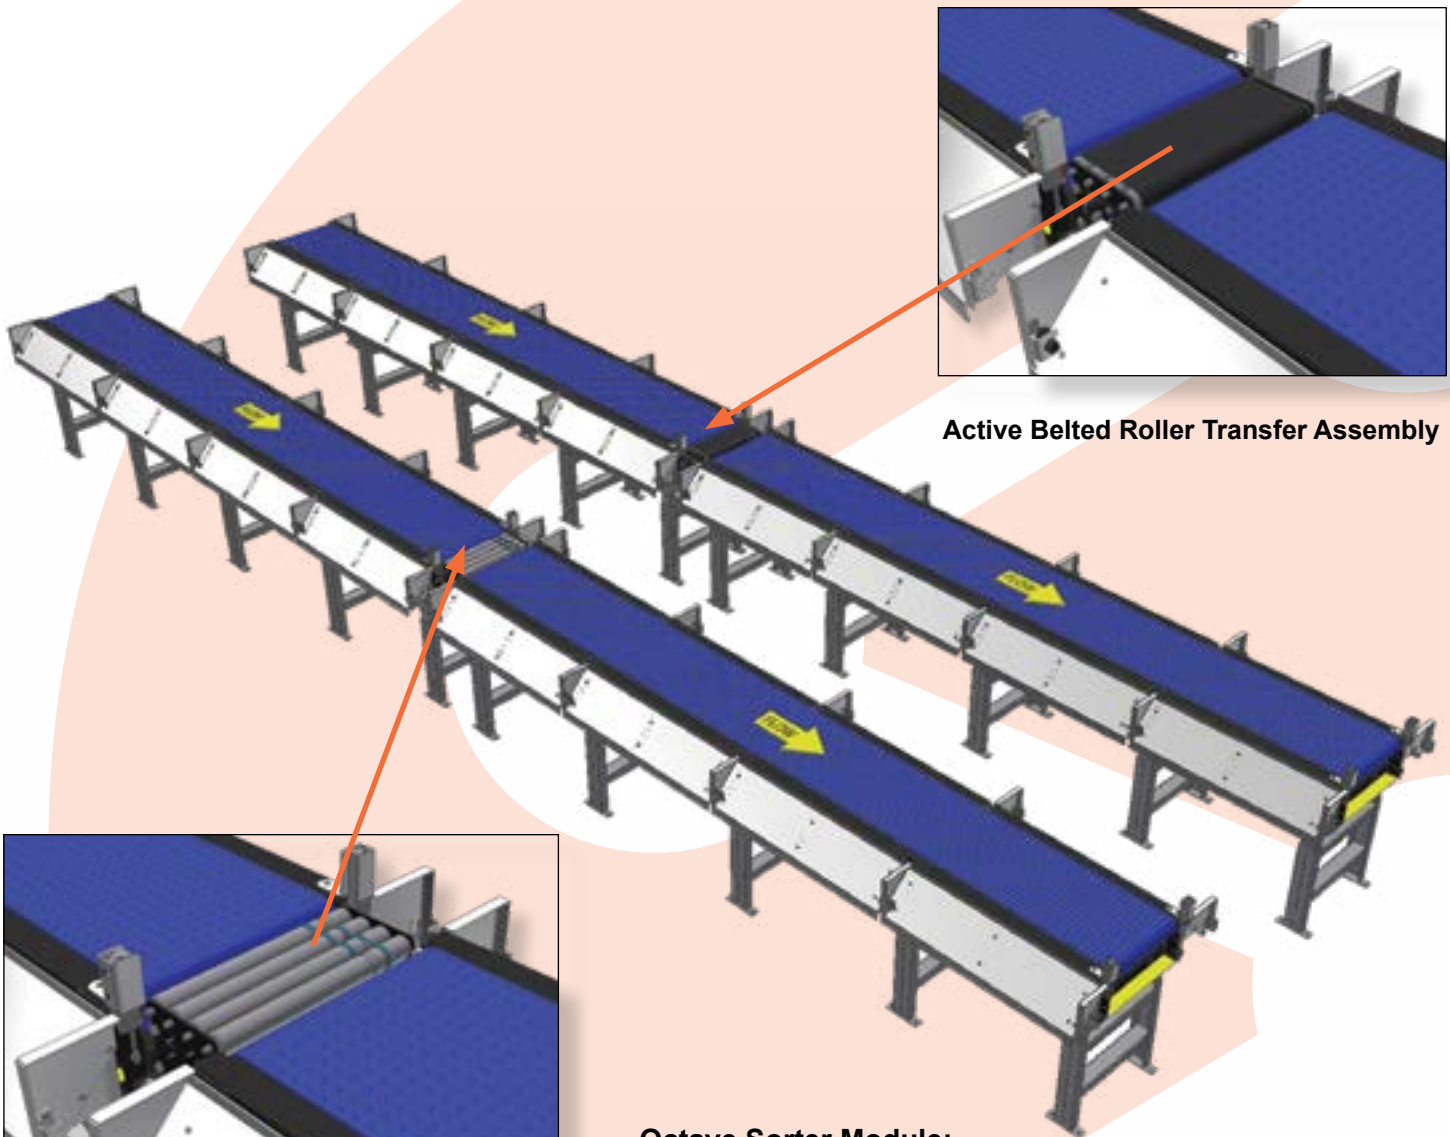

- Bi-Directional Diverters
- 24- Volt DC Divert Drive
- No Transition Points
- Eliminates Transtions To Impove Package Handling
- Single Transport Drive
- Fast Sort Contol System
- Manual Or Automatic Induction System
- Optional Dimension, Weigh, Scan System Available

SNS Modular Sortation System

Operational And Energy Efficient

Our available options are pre-engineered modules that can handle multiple diverts, providing performance flexibility while be energy efficient. SNS electric design provides savings on operational costs by eliminating the reliance on inefficient pneumatic solutions and the associated costs of installing, operating and maintaining compressors. Each system has a safe divert mechanism that is able to deliver high perform without exposing personnel to large mechanical pushers.

Active Belted Roller Transfer Assembly

Active Roller Transfer Assembly

Octave Sorter Module:

- 8 Divert Destination Module
- Extend In Groups Of 8 Cascade Destinations
- 24-Volt Motor Driven Transport And Divert Drives Transitions For Improved Package Handling
- Tracking, Divert And Full Sensors
- Manual Or Automatic Induction System
- Optional Dimension, Weigh, Scan System Available
